# We are Hiring!

---

**Post and Qualification**    **Environmental Impact Assessment Specialist + GIS**

Master's in Environmental Engineering/Planning/Sciences with training and experience on Application of GIS for Impact Assessment and Climate studies

---

**Experience**

- 3-4 years of experience in working on environmental impact assessments. Experience in conducting ESIA with International Reference Framework (IFC PS 2012, ADB and World Bank) would be an added advantage.
- Must have hands on experience in working on softwares such as Arc GIS, Q-GIS, Erdas
- Experience of using data analytics software (e.g., advanced MS Excel, tableau etc.) will be preferred.

---

**Work Profile**

- Core team member to carry out assignments which would essentially include GIS & Remote sensing analysis, baseline information review, report writing and assistance in field visit if required.
- Supporting team lead in business development and client interaction activities.

---

**Skills**

- Excellent verbal and report writing skills. Well conversant with MS Office (word, excel and powerpoint)
- Lead and work collaboratively and supervise the members of team as applicable.
- Strong organizational skills, attention to detail and the ability to structure and prioritise the delivery of project outputs effectively while working as part of a multi-disciplinary team.

---

**Placement Location**

- Mumbai/Ahmedabad
