# We are Hiring!

## Post and Qualification

### Senior Social Impact Assessment Specialist

Master's in Social Sciences with training and hands on experience in Social Impact Assessments and Due diligence.

## Experience

- 4-5 years of experience in working on social impact assessments (across diverse sectors), due diligences, preparation of stakeholder engagement and need based assessment plans.
- Experience in conducting ESIA with International Reference Framework (IFC PS 2012, ADB and World Bank) would be an added advantage.
- Experience in collecting socio-economic data, carrying out field surveys and data analysis.
- Experience of conducting gender studies will be preferred
- Experience of using data analytics software (e.g., advanced MS Excel, tableau, etc.) will be preferred.

## Work Profile

- Core team member to carry out assignments which would essentially include environment and social impact assessments, social due diligence, and other related technical studies.
- Conducting field visits, data analysis and preparation of reports in a timely manner.
- Work will include carrying out consultation with communities and various stakeholders PAN India.
- Supporting team lead in business development and client interaction activities.

## Skills

- Excellent verbal and report writing skills. Well conversant with MS Office (word, excel and powerpoint)
- Lead and work collaboratively and supervise the members of team as applicable.
- Strong organizational skills, attention to detail and the ability to structure and prioritise the delivery of project outputs effectively while working as part of a multi-disciplinary team.
- Willingness to travel for longer periods of intervals – national
